LWC Navigation Mixin

Navigation scenarios

A. Use case #1: Navigate to an external web page

B. Use case #2: Navigate to account home page

C. Use case #3: Link to new default contact create page

D. Use case #4 : Say, you have list of contacts, on click of a contact name navigate user to contact detail page

E. Use case #5: Say, you want to navigate users to a list of open cases list view

```
import { NavigationMixin } from 'lightning/navigation'
this.NavigationMixin.Navigate(
    {
    type: '<web/object/record>',
    attributes:
        {
            '<url | objectApiName | actionName>',
        }
    }
);
```
